Dance DECK

STANDARD

OUR MOST AFFORDABLE PORTABLE DANCE FLOOR
Durable vinyl laminate tiles set into a rugged plastic base offer the look of real wood at an economical price.

DanceDeck (DK) is Signature Flooring's most affordable dance floor. It offers the look of real wood, the durability of a weatherproof base tile, a rapid connection system, and a lightweight, trouble-free design.

Though DK looks like real wood parquet, it doesn't require sanding, polishing, waxing or other maintenance and may be cleaned using standard household cleaning solutions.

DanceDeck's decorative vinyl surface tile is set into a protective polypropylene base tray that surrounds the perimeter of the tile and serves as a shield to prevent surface edge damage or delaminating. **DK's durable base tile is completely weather resistant, allows water to flow underneath, and is impervious to moisture**, making DanceDeck ideal for use in moisture-prone environments such as tents, beachfront areas, or high humidity climates. Each base tile also provides excellent traction over carpeting and other surfaces.

DanceDeck tiles are pre-assembled for transport in 3ft x 3ft sections, but may be broken down in 1ft x 1ft increments (or made larger as required) for customized floor layouts. Each DK section incorporates Signature's unique 7-loop (the most on the market) snap-connection system, which is the strongest such connector design available. Like a zipper, DanceDeck's connectors snap together and detach sequentially, speeding installation and removal.

DanceDeck is ideal for tent renters, hotels and motels, dance studios, homeowners, and even exhibitors and temporary retail display owners. DanceDeck is our most versatile and economical dance floor.

DanceDeck is available in 4 colors: dark wood, light wood, black and white. Transition edging and corner pieces are available in black. Our labor-saving, wheeled Transport Cart (DK-TC) speeds installation and dismantling and is perfect for storage of your dance floor.

Underside provides drainage and is molded in black plastic.

Signature Flooring offers the most complete line of portable dance floors on the market today!

From the most practical and affordable to the ultimate in elegance and performance, Signature has a dance floor for your every need.

Our DanceDeck product consists of 3 floor styles that vary in color, material, design pattern, connection system, and price. Whether you are looking for a practice floor for your home, a spectacular floor for a hotel ballroom, or a premiere dance floor for a dance competition – we offer a broad selection to meet your needs!

Signature Flooring has become a world leader in portable dance floors by offering high levels of customer service and product quality, and a wide range of products to meet every buyers needs. Our full line of DanceDeck flooring is manufactured in the United States to exacting standards and meets all applicable safety standards.

Our customer is our #1 priority and we encourage you to ask questions about our flooring, to compare them to other systems, and to ask for more information and samples. We understand that choosing a dance floor for your facility or institution is an important decision and we are here to help!

DELUXE

THE ELEGANCE OF REAL WOOD AT AN ECONOMICAL PRICE

Real wood parquet set into a rugged plastic base gives the warmth of real wood with the low cost and benefits of a rugged plastic base.

DanceDeck Deluxe (DKX) is Signature's answer for those customers who want the authentic elegance and warmth of real wood along with the lightweight benefits and weather resistance of a plastic base module.

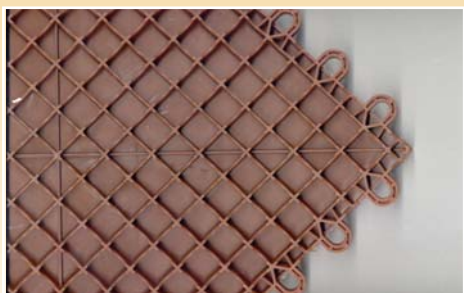

DKX features a wooden Oak surface tile that is set into a protective polypropylene base tray. This base tray surrounds the perimeter of the parquet tile and serves as a shield to prevent edge damage, wood separation or delaminating. DanceDeck's base tile is molded in a color to match the wood surface stain and is virtually invisible when sections are installed. Because DKX's wood tile provides traction, is completely water resistant, and allows water to flow underneath, **DanceDeck Deluxe is ideal for use in a multitude of environments where a traditional wooden floor could not be used.**

DanceDeck Deluxe tiles are pre-assembled for transport in 3ft x 3ft sections, but may be broken down into 1ft x 1ft increments (or made larger as required) for customized floor layouts. (Each DKX section incorporates Signature's unique 7-loop (the most on the market) snap-connection system, which is the strongest such connector design available. Like a zipper, DanceDeck's connectors snap together and detach sequentially, speeding installation and removal.

DKX is extremely popular for tent events, hotels and resorts and is the only hybrid wood/polymer system of its kind. It is the best choice for weddings and other events that demand the elegance of real wood, but require a practical, durable and simple-to-install system.

DanceDeck Deluxe is available in 2 stains: Chestnut and Desert and is varnished with 4 coats of high-gloss urethane to protect against scuffs and scratches. Edging and corner pieces are available in black. DKX is simple to clean and maintain with any standard urethane floor care product. A custom, labor-saving Transport Cart (DK-TC) is available for easy installation, removal, transport and storage.

Channels underneath the tile provide drainage and stability. Underside is molded in a matching-color plastic - allowing for a seamless look.

Ask about our custom TRANSPORT CARTS!

Carts speed installations and provide storage.

PRO

The **ONLY** floor
with solid
wood edging!

OUR HIGHEST QUALITY PROFESSIONAL WOODEN DANCE FLOOR
Real wood construction with durable aluminum framing
provides an institutional level floor for any application.

Signature Flooring's top-of-the-line portable dance floor system, DanceDeck Pro (DK Pro), offers unparalleled quality and performance at a reasonable price. Each DK Pro panel is a high-quality, hand-crafted, portable dance floor for use anywhere a beautiful, high-performance and easy-to-install dance floor is required. Our customers include prestigious clubs, resorts, schools, and municipalities and the most prestigious dance competitions in the world.

DanceDeck Pro's unique manufacturing process and patented connection system makes our floor the industry leader in speed and ease of use. Additionally, our floors look and feel more like a permanent sprung floor as our design "hides" unsightly aluminum framing, thus creating an extraordinarily consistent and beautiful floor that is great to dance on. This feature, combined with a high-gloss wood finish, makes our floors ideal for upscale facilities.

At Signature Flooring, we believe that a portable dance floor should truly be transportable, and as such, DK Pro panels weigh only 25 lbs. and are only 3/4" thick - enabling easy transport, comfortable handling and efficient storage. We offer specially-designed transport carts, which will also protect your floor from damage and loss.

DanceDeck Pro's expertly-crafted interlocking dance floor sections connect easily to adjacent panels without any tools or equipment. Sections simply rotate and snap together using our patented connection system. This unique interlock system ensures that our floors will not disconnect or slip and precludes the need for unsightly metal seaming or holes, common on most other floors. Each dance floor module incorporates a natural spring, which is why professional dancers prefer DanceDeck Pro floors to all others.

Each dance floor module incorporates a natural spring, which is why professional dancers prefer DanceDeck Pro floors to all others.

SALES AND RENTALS

What Our Customers Are Saying:

“This is an amazing floor! Wait until you hear how great it sounds!!” - Tony Danza, *The Tony Danza Show*

“We are very happy with the Signature black and white dance floor that we purchased. It is easy to put together and looks great.” - Resort Manager, Honolulu, Hawaii

“Signature Flooring keeps our sets from looking boring! Excellent craftsmanship and great service keep us returning year after year.” - Travis Sherman, *American Idol, Productions*

“When I am choreographing a routine, I choreograph with the DanceDeck Pro floor in mind. It gives me the freedom to fully express myself and the moves.”

- Jordan Frisbee (*U.S. Open Swing Dance Champion*)

“Not only is the DanceDeck Pro Dance Floor the best to dance on, it allows the dancer to dance up to their potential. This includes spinning, sliding, footwork, or all of the above. You can dance for hours and not feel the impact on your body.” - Mary Ann Nunez (*U.S. Open Swing Dance Champion*)
